EDUCATION

Indian Institute of Information Technology Guwahati
M.Tech in Computer Science and Engineering

2025 – 2027
CGPA: 7.95

Sathyabama University, Chennai
B.Tech in Computer Science and Engineering

2017 – 2021
CGPA: 8.76

SKILLS

- **Languages:** Java, Python, SQL
- **AI/ML:** Machine Learning, NLP, Generative AI, RAG, LLM Integration (Gemini API), scikit-learn
- **Backend:** Spring Boot, RESTful APIs, FastAPI, JWT Authentication
- **Frontend:** React
- **Database:** MySQL, PostgreSQL
- **Deployment:** Docker, Vercel
- **Tools:** Git/GitHub, Postman, Swagger/OpenAPI

EXPERIENCE

Java Full Stack Development Intern
Zidio Development Pvt. Ltd.

May 2026 – Jul 2026
Remote

- Contributed to the design, development, and testing of a full-stack HR platform (NexusHR) using Java, Spring Boot, React.js, and PostgreSQL – translating business requirements into actionable technical outcomes.
- Built REST APIs and authentication workflows; performed code development, unit testing, test data preparation, and test execution, following established quality standards through deployment.
- Authored technical and architecture documentation (README, API docs) as part of the project submission deliverables.

Founder's Office Intern – Strategy & Growth
Hireginie Talent Cloud Pvt Ltd

Dec 2025 – Jan 2026
Remote

- Worked closely with the founders to understand business operations, performing client-facing business analysis and market research to support data-driven strategic decision-making.
- Managed operational data and reporting in Excel, analyzing data to identify patterns and generate insights; built dashboard reports for stakeholder visibility.
- Conducted interviews for new joiners, generated leads through professional networks, and identified growth opportunities through operational and competitor analysis.

PROJECTS

AI-Powered EHS Risk Intelligence Platform — Python, scikit-learn, RAG, Gemini API, Streamlit

Live Demo

- Translated business requirements from real OSHA severe-accident data (4,470 records) into an actionable technology solution – analyzing the data and applying NLP-based classification of incident narratives to identify risk patterns and generate insights for decision-making.
- Developed and tested a risk/severity classification model (Random Forest, Logistic Regression) with SHAP-based explainability analysis, plus a RAG agent (Gemini API) that retrieves OSHA compliance guidance to draft recommendations – supporting risk management and regulatory-compliance use cases end-to-end.
- Built a client-facing Streamlit dashboard so safety officers can query risk data and compliance requirements in natural language, and authored technical documentation covering the data pipeline and model design.

Placement Record Management System (PRMS) — Java, Spring Boot, Python, FastAPI, RAG, React.js, MySQL Live Demo

- Analyzed requirements and designed a RAG-based resume-JD skills-gap analyzer as an independent Python (FastAPI) microservice that extracts skills from resumes/JDs using semantic similarity and generates personalized, LLM-powered (Gemini API) recommendations – integrated with the main Java application over REST.
- Built a full-stack application (Spring Boot, React, MySQL) implementing JWT authentication, role-based access control, and data-privacy/security controls across 4 portals; performed code development, test data preparation, and test execution throughout the SDLC.
- Automated data ingestion via the Google Sheets API and built a real-time analytics dashboard to analyze placement trends, supporting stakeholder decision-making; deployed and operated the full stack in production (Docker), including resolving a real connectivity issue and executing a production data migration.

NexusHR – AI-Enabled Enterprise HR Platform — Java, Spring Boot, PostgreSQL, React, RAG

Live Demo

- Engineered a RAG-based HR chatbot (PgVector + Gemini API) for grounded policy Q&A, plus an ML-based attrition-prediction model that analyzes workforce data to surface at-risk employees and support HR decision-making.
- Supported end-to-end application development and system integration for a full-stack enterprise HR platform (Spring Boot REST APIs + React UI) covering employee/department management, real-time attendance, and leave management.
- Implemented data privacy and security controls – JWT authentication, role-based access control, and audit-trail logging – and documented the architecture for production deployment (Docker) as part of risk-management process design.

LEADERSHIP

- Placement Coordinator, Placement Working Committee, IIIT Guwahati
- Vice President, Microsoft Campus Club, Sathyabama University

(2026 – Present)
(2019 – 2021)
